To Whom It Concerns

We employed the services of Leamore Construction Ltd following the appropriate tendering process to construct two new classrooms, a corridor, offices and a school shelter. The project was carried out under the Devolved Grant Scheme and supervised by John P Delaney Architects, Newbridge.

We found Leamore to be an excellent firm to deal with in every way. Work was carried out to a very high standard and was completed on time during our summer holidays, in spite of some of the worst summer weather in years. They were always very approachable and regularly consulted the Chairman and myself before proceeding with elements of the job. We held site meetings every two weeks from the beginning to the end of the job, which were attended by Leamore representative, Engineer Arjen Delaney, our Chairman and myself. At every meeting work had been completed ahead of schedule. All sub contractors for electricity, plumbing etc. were of the highest standard. The Snag List, which was short, was attended to promptly and the school site was restored to perfect order.

Based on our experience, I can readily recommend Leamore Construction for any job.

Yours faithfully

Damian White
Principal
